

## Ultima launches world's first and smallest USB digital TV Set-top Box

Having launched the world's first USB2.0 Digital TV Box ARTEC T1 in 2004 and the smallest USB2.0 Digital TV Stick ARTEC T14, Ultima Electronics is presenting the world's smallest USB2.0 Micro Digital TV Set-top Box ARTEC T12.

The match-box sized ARTEC T12 makes portable digital TV reception come true by plugging into a USB 2.0 port on a notebook PC or a desktop PC wherever you go. The friendly design of ARTEC T12 easily copes with different positions of USB ports on all kinds of notebook PC or desktop PC to secure an easy use of the remote control.

Embedded with popular functions of auto channel scan, EPG and time-shifting, ARTEC T12 features with unique PIP (Picture in Picture) to allow watching 2 programs in the same channel simultaneously. Also, the on-fly decoding technology and high quality reception guarantees the superior performance of ARTEC T12.
