Ultima Electronics Corp.
Your best digital TV partner

Artec T3, Mini DVB-T Receiver

The leading digital TV device manufacturer Ultima Electronics Corporation (maker of "ARTEC" brand) launches the first palm-size set-top box (STB) ARTEC T3 for digital TV--, followed by the smallest USB digital TV receiver ARTEC T14.

The ARTEC T3, embedded with Ultima's own cutting-edge technology for superior reception, allows to watch digital TV channels on a conventional TV set or a LCD display of PC for crystal-clear pictures and CD-quality sounds.

Michael Yang, VP of Sales and Marketing for ARTEC, points out the beauty of ARTEC T3 that "compact and slim size of ARTEC T3 gives no burden to your TV set and there is no need to comprise your desktop space while watching DTV programs on your LCD display. The most-talked-about benefit of ARTEC T3 is it transforms your forgotten out-of-date PC monitor or aged TV into a brand-new digital TV set!"
